Comments: No interviews were conducted.

Is the evaluated use attainable? ☒ Yes ☐ No

Comments: The survey occurred in June 2005 and no WBCR was observed. Livestock watering use at most sites. The stream did not meet the maximum depth criterion at any of the 5 sites and it met the average depth criteria in only 1 site (04). Because the depth requirements are not met in the upper portions of this stream, the committee recommends modifying the use of this stream as follows: retain the WBCR use at site 4 and downstream, but remove the use above site 4.

Committee Recommendation: ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
